Summary

Software Engineer with strong backend expertise and hands-on experience in multi-framework environments. Developed impactful projects such as an AI-powered CV platform and an employee management system that streamlined operations. Skilled in delivering scalable digital solutions that address real-world challenges. I am currently seeking an end-of-study internship to apply technical skills and drive meaningful results for your team.

WORK EXPERIENCE

Wide Insights | *intern developer*   **Jul 2025 - Aug 2025**

- Developed OneCv, a web platform that imports data from GitHub and LinkedIn via REST APIs to streamline CV creation
- Implemented AI-powered features allowing users to generate tailored CVs based on job titles, improving personalization and efficiency
- Built RESTful APIs to enhance server-client communication and integrate OCR capabilities for data extraction
- Technologies: **Express.js, React.js, Docker, Git, MongoDB, OCR**

Condori | *intern developer*   **Jan 2023 - May 2023**

- Developed full-stack web applications to showcase company services and increase client engagement
- Built platforms that effectively attract potential clients and facilitate seamless transactions
- Designed responsive interfaces to build user trust and drive conversions
- Technologies: **Laravel, React, MySQL**

Condori | *intern developer*   **Jan 2022 - May 2022**

- Developed a comprehensive parking management platform to monitor and manage vehicle flow, including truck arrivals and departures
- Implemented real-time tracking features to optimize parking space allocation and improve operational efficiency
- Built admin dashboard for streamlined oversight of parking operations and automated reporting
- Technologies: **Django, React, PostgreSQL**

UNIVERSITY PROJECTS

Patient Management App

- Created a healthcare management platform for doctors to manage patient records and facilitate patient access to medical information
- Designed role-based system with secure authentication and intuitive user interface
- Developed database layer using ORM for efficient data persistence and retrieval
- Tech Stack: **Java EE, Hibernate, JSP/JSTL, Bootstrap, Maven**

Cloud-Deployed Web Application (end of year project)

- Built a full-stack web application for final year project with responsive UI and robust backend
- Implemented containerization for streamlined deployment and environment consistency
- Managed cloud deployment and hosting for production-ready application
- Tech Stack: **React, Laravel, Docker, AWS**

EDUCATION

International Institute of Technologies, Sfax   **Sep 2023 - Present**
Software Engineer in software engineering and business intelligence   *Sfax*

Higher Institute of Technological Studies, Sfax   **Sep 2020 - Jun 2023**
Bachelor's degree in development of informatics systems   *Sfax*

Elkhalij School   **Jul 2020**
Baccalaureate in Mathematics   *Sfax*
